**RESPONSE TO RESTRICTION REQUIREMENT**

Sir:

Claims 1-72 are pending in this application. In the outstanding Restriction Requirement dated June 22, 2006, claims 1-72 were restricted into five groups. In response to the Restriction Requirement, Applicants elect the claims of Group I (claims 1-18 and 21-29) with traverse.

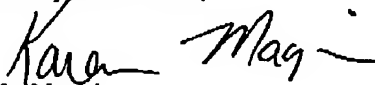

The election is with traverse on the basis that it would not present a serious burden to search and examine claims 1-72 on the merits concurrently (see, MPEP § 803). In particular, it would not present a serious burden to search and examine the claims of Groups I to III concurrently because all recite a chimeric polypeptide comprising a secretory signal sequence operably linked to a lysosomal polypeptide, and further a search of the claims of Group I encompasses the same class and subclass as the claims of Group III.

Accordingly, the restriction of claims 1-72 should be reconsidered and withdrawn.

Further, should the restriction be maintained, once allowable subject matter is identified, the restriction should be withdrawn with respect to the method claims of Group III (claims 30-37), and these claims should be examined on the merits.

This application is now in condition for substantive examination, which action is respectfully requested.

Respectfully submitted,

  
Karen A. Magri
